*Commercial analytics professional with 4+ years of pharmaceutical forecasting, business analytics, and performance reporting experience — building net-sales and demand forecasting models, sourcing and analyzing IQVIA data, and delivering Excel/SQL-based performance dashboards that drive steering committee and executive decision-making*

## PROFESSIONAL EXPERIENCE:

**Project Lead** (SQL, Snowflake, Python, Tableau, Power BI, Salesforce, IQVIA, Advanced Excel)  
Atria Inc

**Berkeley Heights, NJ**  
July 2022–Current

- Lead end-to-end commercial performance reporting and forecasting for 3 top-tier pharmaceutical clients across Human Pharma and Animal Health, delivering visibility into demand trends, territory performance, and revenue planning for sales leadership and steering committees.
- Partner closely with Finance, sales leadership, and cross-functional stakeholders to translate complex commercial data into executive-ready insights and actionable business recommendations.
- Process millions of transaction-level records daily for a leading Animal Health manufacturer, writing complex SQL queries against Salesforce CRM and transactional data spanning six commercial teams to build a monthly Excel/SQL-based performance reporting view for steering committee review.
- Source and validate IQVIA data to support sales operations, Incentive Compensation plan design, IC analytics, and payroll calculations for a specialty pharmaceutical client, ensuring accurate territory-level performance and compensation outcomes.
- Develop dashboards, reporting tools, and KPI scorecards (Power BI, Excel) that improve data visibility and reporting accuracy, driving monthly steering committee reviews and portfolio planning decisions.
- Partner with data engineering and IT teams to unify commercial data models and pipelines, cutting manual reporting effort by ~80% and standardizing metric definitions across a fragmented reporting landscape.
- Build and maintain forecasting models supporting quarterly and annual revenue planning — applying statistical forecasting techniques to territory performance, gross-to-net target-setting, and Incentive Compensation design tied to net sales budgets.
- Developed a statistical forecasting methodology that landed projected revenue targets within ~90% of client budget expectations and actual outcomes, strengthening forecast accuracy trusted by Finance leadership.
- Manage a team of 2–3 analysts, owning project delivery, client relationships, and quality control before work reaches decision-makers.

**Data Analytics Intern** (R, Clustering, Time Series Forecasting, EDA, Inventory Management)  
Client: U.S. Market Leader in multinational home appliance manufacturer

**Winston-Salem, NC**  
October 2021–May 2022

- Analyzed 9+ years of sales data (1M+ records) in R, applying clustering techniques to group parts by demand pattern and forecast pipeline/demand trends across product life cycles.
- Identified 4 distinct product life cycle patterns and built time-series forecasts of future trend direction to support strategic initiatives.

**Teaching Assistant of Statistics** (ANOVA, Regression, Translate Complex Concepts)  
College of Management, National University of Kaohsiung

**Kaohsiung, Taiwan**  
September 2019 – June 2020

- Taught Hypothesis Testing, ANOVA, and Regression to 100 students across 4 departments, helping 20+ students move from below class average to over 10% above it.
- Split 100 students into 5 project teams and coached them through their statistics projects from start to finish.

## EDUCATION:

**Wake Forest University School of Business**  
Master of Science in Business Analytics | GPA: 3.79/4.0

**Winston-Salem, NC**  
May 2022

**Relevant Coursework:** Predictive Analytics & Data Mining, Machine Learning in R, Forecasting, Probability and Statistical Modeling, Data Management, Visual Analytics & Influencing, Marketing Analytics

**National University of Kaohsiung**  
Bachelor of Arts in Economics | GPA: 3.27/4.0 | Third rank in the Economics Department (2017-2018)

**Kaohsiung, Taiwan**  
June 2020

**Relevant Coursework:** Python Programming, Linear Algebra, Time Series Analysis, Advanced R for Data Analytics and Application

## AREAS OF EXPERTISE:

**Analytics Tools:** SQL, Snowflake, MySQL, IQVIA, Tableau, Power BI, Salesforce CRM, Python (NumPy, Pandas, scikit-learn), Advanced Excel (VBA, VLOOKUP, Pivot Tables), R, Stata, Claude, Copilot
